

ON SITE SERVICE

Machine Audit

Our team repairs and adjusts filler, capper, and conveyor systems, including annual filler valve rebuilds, system adjustments, and troubleshooting filling and capping issues.

Headset Rebuild

Our team provides headset rebuild services, including removing headsets from the machine, rebuilding and reinstalling them, and making adjustments to ensure efficient operation.

ROPP Rebuild

Our team provides rebuild and adjustment services for ROPP heads, including restoring components and fine-tuning performance to ensure smooth, efficient operation.

Spindle Rebuild

Our team provides rebuild services for capping spindles, including restoring components and making adjustments to ensure smooth, efficient operation.

ABOUT US

Founded in 1995, Precision Torque Control, Inc. has been an industry leader in providing bottle capping equipment:

- Smooth torque magnetic headsets.
- Cap chucks including single piece, articulating mechanical, and pneumatic.
- Bottle retention knives, filler and capper parts.

WHY CHOOSE US

- All products designed and manufactured in the USA.
- Capable of diagnosing and resolving issues on a wide variety of OEM filling and capping equipment.
- Experienced service teams available at competitive rates.
- Fast response on service, parts, and troubleshooting issues.
